

It is very damaging to the democracy in America to have the media concentrated in so few hands. Stories of corruption in government and in the corporations will not be aired. Already the interest of the broadcasting media has superseded the public interest by not covering the story of the FCC changes under consideration. Bigger does not mean better. Corporate control of the United States Congress is already evident. Look at how long corporations operated illegally and unethically with no oversight by either Congress or the media. Please do not allow these huge mergers to continue and be increased. America is great because of her diversity, not her monoculture, which corporations tend toward.
